LIST OF BASIC CHINESE-CANTONESE MILITARY WORDS

This list contains 565 words commonly used in the discussion of military subjects. It is designed to be used as a guide in future revisions of military lessons and as an aid for instructors in the classroom discussion of these terms.

For words and terms not included in this list reference should be made to the following publications:

1. AR 320-5 Dictionary of United States Army Terms
2. JCS Pub. 1 Dictionary of United States Military Terms for Joint Usage
3. Appropriate Field and Technical Manuals

The Chinese translation of these words is based on the Chinese version of SR 320-5-1 Dictionary of United States Army Terms which was translated into Chinese and published by the GHQ Army, Republic of China.

basic load--That quantity of ammunition and/or supplies authorized to be carried by individuals and on the vehicles of a unit.

basic tactical unit--Fundamental unit capable of carrying out an independent tactical mission in any branch of the Army, such as a rifle company in the infantry, or a battery in Artillery.

basic training--Training in basic military subjects and fundamentals of basic infantry combat given to newly inducted and enlisted Active Army and Reserve Components male personnel without prior military service.

battle casualty--Any person who is killed, wounded, missing, captured, or interned, provided the incident occurs in action, or death later results from wounds received in action.

battle group--A major combat element of the current Infantry Division.

beachhead--Designated area on a hostile shore which, when seized and held, insures the continuous landing of troops and materiel, and provides maneuver space requisite for the projected operations ashore.

biological agent--Viruses, any of certain classifications of microorganisms and toxic substances derived from living organisms used to produce death or disease in man, animals, and growing plants.

biological warfare--Employment of living organisms, toxic biological products and chemical plant growth regulators to produce death or casualties in man, animals, or plants; or defense against such action.

bivouac area--A bivouac area is an area in the field where troops are assembled for rest, rehabilitation, or training,

or where a rear installation is maintained. Usually, there is no construction for shelter.

blackout--Passive defense measure consisting of screening or extinguishing all lights that might be seen by the enemy.

blast effect--The effect produced by destructive forces generated by an explosion and which are transmitted through the air. Generally blast occasions damage on and above the surface of the ground in contrast with the mining effect of a projectile or charge which goes off beneath the surface.

blocking force--A force used to prevent enemy forces from approaching from a given direction.

blocking position--A position organized to delay the enemy access to a given area or to prevent further advance of the enemy in a given direction.

boat, assault--A landing craft designed for landing assault troops and material on an enemy beach.

bomb--A missile, containing an explosive, chemical, radiological or biological filling, generally designed to be dropped from an aircraft.

bomb line--An imaginary line, designated by the appropriate ground commander, forward of which tactical air forces utilizing nonatomic weapons are free to attack targets, within the overall air/ground plan, without coordinating the attacks with the ground forces. To the rear of this line, air strikes against enemy surface targets will be requested or approved by the appropriate ground commander. The bomb line should, if possible, follow well defined terrain features.

booby trap--An explosive charge which is exploded when an unsuspecting person disturbs an apparently harmless object or performs a presumably safe act.

boundary--A line designating the lateral limits and depth of zones of action or of area, or sectors of defense.

branch--1. An arm or service of the Army, i.e., Artillery, Armor, Signal. 2. A subdivision of any organization.

bridgehead--A position or area on the hostile side of the river or defile that is established by advance troops of an attacking force to protect and cover the crossing of the main

body over the river or defile, or as a base for further operations.

brigade--Tactical or tactical and administrative unit consisting of a headquarters and two or more groups or regiments. A brigade is usually commanded by a brigadier general.

buildup--Process of attaining prescribed strengths of units and prescribed levels of vehicles, equipment, stores, and supplies.

bullet--Shaped piece of lead, steel, or other metal designed to be shot from a rifle or other firearm of small caliber. The bullet is part of the cartridge. The explosion of the propelling charge in the cartridge case expels the bullet violently.

bunker--A fortified structure for the protection of personnel, defended gun position, or a defensive position.

burst--1. Series of shots fired by one pressure on the trigger of an automatic weapon. 2. Explosion of a projectile in the air or when it strikes the ground or target.

cadre--Key group of officers and enlisted men necessary to perform essential duties in the formation, administration, and training of additional men to complete the unit.

caliber--1. Diameter of the base of a gun. In rifled gun bases the caliber is obtained by measuring between opposite lands. A caliber .45 revolver has a barrel with a land diameter 45/100 of an inch. 2. Diameter of a projectile. 3. Unit of measure used to express the length of the bore of a weapon. The number of calibers is determined by dividing the length of the bore of the weapon, from the breech face of the tube to the muzzle, by the diameter of its bore. A gun tube the bore of which is 40 feet (480 inches) long and 12 inches in diameter is said to be 40 calibers long.

call sign--Group of letters or numerals or of both, used for the identification of nets, stations, commands, and commanders, in the operation of electrical means of signal communication.

camouflage--A general term used to describe any measure the aim of which is to mislead by misrepresenting the existence or the true identity of any installation, equipment, or activity; a term used to describe the series of related concealment and deception measures which may form a part of

the overall plan for the protection of installations, equipment, or activities.

camp--1. Group of tents, huts, or other shelter set up temporarily for troops. A camp is more permanent than a bivouac. A temporary military post is called a camp, permanent one a fort. 2. Place where tents, huts, or temporary buildings are set up. 3. Make a camp; put up tents, huts, or other shelter.

cannibalize--1. To remove serviceable parts from one item of equipment in order to install them on another item of equipment 2. To use personnel of one or more units to complete the authorized strength of another unit.

cannon--1. Fixed or mobile weapon, larger than small arms, that throws its projectile by the use of an explosive. Cannon includes guns, howitzers and mortars. 2. That portion of an artillery weapon required to fire a projectile; tube, breech-mechanism, and firing mechanism of an artillery weapon.

capabilities (enemy)--Those courses of action of which the enemy is physically capable, and which, if adopted, will affect the accomplishment of our mission, either favorably or unfavorably. The term "capabilities" includes not only the general courses of action open to the enemy such as attack, defense, or withdrawal but also all the particular courses of action possible under each general course of action. "Enemy capabilities" are considered in the light of all known factors affecting military operations including time, space, weather, terrain, and the strength and disposition of enemy forces.

captain--Commissioned officer of the Army, Marines, or Air Force ranking below a major and above a first lieutenant. Commissioned officer of the Navy ranking above a commander and below a commodore.

carbine--A light, caliber .30 rifle, with a short barrel.

carrier--Special purpose wheeled or track laying motor vehicle designed for transporting personnel, supplies and/or material. The term normally is combined with words naming the special function of the carrier, e.g., armored personnel carrier, amphibious cargo carrier, etc.

cartridge-Round of ammunition wherein the propellant, primer and projectile are assembled, stored, shipped, and issued as a complete unit.

casualty--See battle casualty.

cavalry--Highly mobile ground units, horse, motorized, or mechanized. See Armored Cavalry.

censorship--The review of, or surveillance over, communications of all kinds, such as correspondence, telecommunications, and news material to prevent information of military value from reaching the enemy.

chain of command--Succession of commanding officers from a superior to a subordinate through which command is exercised. Also called command channel.

challenge--1. Any process carried out by one unit with the object of ascertaining the friendly or enemy character or the individuality of another. 2. Make formal objection to having a certain member on a military court. Either the accused or the trial counsel may make a challenge. 3. Formal objection made to having a certain member on a military court. (See reply and password)

chaplain--Clergyman commissioned as an officer in the Corps of Chaplains. He is a staff officer, and advises the commander on all matters affecting the moral and religious welfare of the command. He is responsible for the religious welfare of all persons subject to military control.

charge--1. Explosive used in firing a gun. A propelling charge throws a projectile from a gun. A bursting charge breaks the casing of a projectile to produce the demolition, fragmentation, or chemical action. 2. Part of the fire command used to establish the amount of propellant to be used with a shell. 3. Violent final rush in an attack or assault, usually applied to a mounted attack. 4. Formal written accusation against an accused initiated by someone bringing to the attention of the military authorities information concerning a supposed offense committed by a person subject to military law.

chemical agent--Solid, liquid, or gas which through its chemical properties produces lethal, injurious, or irritant effects; a screening or colored smoke; or an incendiary agent .

chemical bomb--Bomb containing a chemical agent (war gas, screening smoke, or incendiary).

chemical mine--A mine containing a toxic chemical designed to

kill or disable personnel and/or to contaminate materiel and terrain.

chemical officer--Officer, usually a member of the Chemical Corps, who serves on the staff of a commander of a division or higher unit and advises the commander and his staff on all matters regarding chemical, biological, and radiological warfare.

chemical warfare--Tactics and technique of conducting warfare by use of toxic chemical agents.

chief of staff--The senior or principal member or head of a staff, or the principle assistant in a staff capacity to a person in a command capacity; the head or controlling member of a staff, for purposes of the coordination of its work; a position, which in itself is without inherent power of command by reason of assignment, except that which is invested in such a position by delegation to exercise command in another's name.

civil affairs--Matters concerning the relationship between military forces located in a friendly country or area and the civil authorities and people of that country or area, usually involving performance by the military forces of certain functions or the exercise of certain authority normally the responsibility of the local government. This relationship may occur prior to, during, or subsequent to military action in time of hostilities or other emergency, and is normally covered by a treaty or other agreement, express or implied.

classify--To assign one of the three defense classification categories of TOP SECRET, SECRET, OR CONFIDENTIAL, depending upon the sensitivity of the information.

clearing station--Medical installation which receives casualties from collecting stations, and gives additional treatment to, classifies, and makes further disposition of those patients.

close column--1. Mass formation in close order drill in which the companies are arranged in column of platoons at reduced distances, each platoon remaining in line. 2. A motor column in which vehicles are closed up to safe driving distance behind the preceding vehicle.

close combat--Fighting at close quarters with the enemy utilizing small arms, bayonets, and other hand weapons.

close order drill-Drill formation and movements that are done at normal interval or at close interval. The formations and movements are those usually performed in drill marching, parades, and reviews, and those involving the manuals of the various hand weapons.

close support--Effective air or ground support given at close range by one combat arm or unit to another combat arm or unit.

code--Any system of communications in which arbitrary groups of symbols represent units of plain text of varying length. Codes may be used for condensation or for secrecy.

collecting station--1. Any place in the forward area for collecting and sorting salvage materials. 2. Medical station in the forward combat zone where casualties are treated, sorted, returned to duty, if fit, or prepared for evacuation to a clearing station in the rear. 3. Any place designated for the grouping of refugees, expellees, and evacuees prior to their return to their normal place of habitation of designated disposition.

colonel--A commissioned officer of the Army, Air Force, and Marine Corps ranking above a lieutenant colonel and below a brigadier general. Corresponds to the rank of captain in the Navy.

column--1. Formation in which elements are placed one directly behind the other. A column of men is usually made up of a number of files and called a column of twos, threes, or fours. 2. All the elements of a unit using a single route movement. 3. Stack which is one pallet load or container wide, one deep, and two or more high. 4. In cryptography, vertical sequence of symbols or groups of symbols.

combat--Used as synonym for fighting.

combat intelligence--That knowledge of the enemy, the weather, and the geographic features which is used in the planning and conduct of tactical operations within a given area. See intelligence.

combat partol--Tactical unit sent out from the main body to engage in independent fighting; detachment assigned to protect the front, flank, or rear of the main body, by fighting if necessary.

combat reconnaissance--Reconnaissance of the enemy in immediate contact with one's own forces, preliminary to, or during combat. See reconnaissance.

combat support--Operational assistance furnished combat elements by other designated units.

combat troops--Those units or organizations whose primary mission is destruction of enemy forces and/or installations. See troops.

combat(fighting) vehicles--Vehicle, with or without armor and/or armament, designed for specific fighting functions. Limited armor protection and/or armament mounted or installed as supplemental equipment on vehicles of otherwise noncombat type will not change the classification of such vehicles to combat vehicles.

combat zone--That part of the area of operations required by the combat forces for the conduct of operations. It includes geographical areas in which organic and supporting weapons are located and extends into enemy controlled areas to the maximum range of these weapons. It may be divided for tactical control into army group, field army, corps, and division areas; each is controlled by the commander thereof.

combined arms team--Team of two or more arms, each supplementing the other's capabilities by aiding the forward movement of the team through the employment of its own special capabilities; usually consists of tanks, infantry, engineers, artillery.

command--1. Authority that an individual exercises over his subordinates because of his grade and assignment. 2. Order given by a commander; that is, the will of the commander expressed in a definite form for the purpose of bringing about a particular action in a specific way. 3. Unit or units, or an area, under the command of one individual. 4. To dominate by a field of weapon fire or by observation from a superior position.

command post--The station of a unit's or subunit's headquarters where the commander and the staff perform their activities. In combat a unit headquarters is often divided into echelons; the echelon in which the unit commander is located or from which he operates is called the command post.

communications--1. The means of conveying information of any kind from one person or place to another except by direct unassisted conversation or correspondence. 2. Routes and transportation for moving troops and supplies especially in a theater of operations.

company--Basic administrative and tactical unit in most arms and services of the Army. A company is on a command level below a battalion and above a platoon and is equivalent to a battery of artillery, etc.

compass azimuth--Angle measured clockwise from a north point determined by means of a compass reading. Because of variations of the compass, it may not agree with an azimuth measured from true magnetic north.

compass bearing--Direction or bearing as given by a compass reading.

compass magnetic--An instrument which utilizes a magnetic needle to indicate directions. These directions are from magnetic North, but the needle may be deflected if there are other magnetic materials present.

concealment--The act or result of actions designed to hide or disguise men or materiel from the enemy; the application of camouflage and/or screening techniques with the aim of denying information as to the existence, nature, disposition, or purpose of installations, equipment, or activities. Concealment offers protection from observation only. See cover.

concentration--1. Volume of fire placed on an area within a limited time, or an area designated and numbered for future reference as a possible target. 2. Amount of war gas or screening smoke present in a given volume of air. Irritant concentration is one which causes person to feel presence of gas. Intolerable concentration (for tear gases) is one in which person cannot keep eyes open. Lethal concentration is one which can kill personnel. 3. Assembly of troops in a given locality for purposes of training, attack, or defense.

contamination--Presence of, or act of placing a CBR agent on a person, object, or area.

contour line--1. Imaginary line on the surface of the earth, all points of which are at the same elevation above, or below, a datum plane, usually mean sea level. 2. Line on a map

representing the imaginary contour line described above.

contour map--Map showing heights above sea level by lines that connect points on a land surface having the same height.

control--1. Authority which may be less than full command exercised by a commander over part of the activities of subordinate or other organizations. 2. (geographic) A system or network of points of fixed geodetic positions, with latitude, longitude, and elevation determined with surveying instruments.

convoy--1. A number of merchant ships or naval auxiliaries or both, usually escorted by warships and/or aircraft, or a single merchant ship or naval auxialiary under surface escort, assembled and organized for the purpose of passage together. 2. A group of vehicles organized for the purpose of control and orderly movement with or without escort protection.

coordinate--In mathematics and mapping, any of two or more distances that define the position of a point, line, or plane, by reference to a fixed figure or system of lines.

coordinated attack--Carefully planned and executed offensive action in which the various elements of a command are employed in such a manner as to utilized their powers to the greatest advantage to the command as a whole.

corporal--Non-Commissioned officer ranking below sergeant; lowest ranking non-commissioned officer in the Army.

corps--1. Tactical unit larger than a division and smaller than an army. A corps usually consists of two or more divisions together with auxiliary arms and services. In this meaning, formerly called army corps. 2. One of the branches of the Army; major subdivison of an arm or service, such as Corps of Engineers, Quartermaster Corps, and Medical Corps of the Army Medical Service.

corps troops--Troops assigned or attached to a corps, but not a part of one of the divisions that make up the corps. They are assigned or attached for special purposes, and often for a limited time. See troops.

counterattack--Offensive action by a part or all of a defending force against an attacking force for the purpose of restoring the original positions and/or trapping and destroying the hostile forces at a point particularly favorable to the counterattack.

counterfire-- Fire intended to destroy or neutralize enemy weapons.

counterintelligence--That aspect of intelligence which, in peace or war, is concerned with the detection, prevention, and neutralization of espionage, sabotage, subversion, or other inimical foreign intelligence activities. See intelligence.

counterreconnaissance--All measures taken to prevent hostile observation of a force, area, or place.

court-martial--1. Military court for the trial of persons subject to military law. There are three types of courts-martial, summary, special, and general. 2. Trial by such a court. 3. Try by such a court.

cover--1. The action taken by land, air, or sea forces to protect by offense, defense, or threat of either or both. 2. Shelter or protection, either natural or artificail, from enemy fire. 3. To maintain a continuous receiver watch with transmitter calibrated and available but not necessarily available for immediate use. 4. The assumed identity and/or purpose through which an undercover agent disguises his true identity and/or mission.

covering force--A force which normally operates well forward of the main force with the mission of making early development of the situation, defeating hostile forces if possible, and deceiving, delaying, and disorganizing enemy forces until the main force can prepare for action. It engages in any type of combat necessary for the accomplishment of its mission. Covering forces are used in offensive and defensive operations and retrograde movements.

crew--Group of men who work together as a team in the operation of a ship, aircraft, gun, tank, etc.

critical terrain--Any locality, or area, the seizure of retention of which affords a marked advantage to either combatant.

critique--Discussion and review of a military exercise or operation, bringing out errors and successful performances.

D-day--The term used to designate the unnamed day on which an operation commences, or is to commence. This operation may be the commencement of hostilities, the date of an assault landing, a bombardment, etc. Whereas "D" is the letter

customarily employed to designate the day on which an operation commences, if more than one such event is mentioned in a single plan (or for any other reason) any letter (except "H", "J", "K", or "M") may be used. The equivalent rule applies to "H" hour." Time in plans will be indicated by a letter which shows the unit of time employed, and figures with a minus or plus sign to indicate the amount of time before or after the reference event, e.g., "D" is for a particular day, "H" for an hour. Similarly, "D+7" means "7 days after D-day," "H+2" means "2 hours after H-hour." If the figures become undully large e.g., "D-day plus 90," the designation of "D+3 months" may be employed, i.e., if the figure following a letter plus a time unit ("D-day," "H-hour," etc.) is intended to refer to units of time other than that which follows the letter, then the unit of time employed with the figure must be spelled out. It should be noted that "D+3 months" is the point in time that occurs three months after D-day. If it is desired to refer to the month as a period of time, this will be done as follows: "month D+O" means "month beginning at D-day;" "month D+1" means "month beginning at D+1 month;" etc. Though "m" is by custom used to designate Mobilization Day, the letter "m" plus a figure, will stand for months following Mobilization Day. Jour J is the French equivalent of D-day. See H-hour; M-Day.

dead space--1. Area within the maximum range of a weapon, radar, or observer which cannot be covered by fire or observation from a particular, position because of intervening obstacles, the nature of the ground, or the characteristics of the trajectory or the limitations in the pointing capabilities of the weapon. 2. The area or zone which is within range of a radio transmitter, but in which a signal is not received. Also called dead area and dead ground.

debarkation--Unloading of troops, equipment, or supplies from a ship or an aircraft.

decode--To convert from code to ordinary language.

decontaminate--Make any contaminated object, person, or area safe for unprotected personnel by covering the chemical agent, biological agent, or radioactive material; removing it; absorbing it; destroying it; or changing it into harmless substances.

decoration--Distinctively designed mark of honor denoting heroism or meritorious or outstanding service or achievment. The decorations in order of precedence follow: Medal of Honor,

Distinguished Service Cross, Distinguished Service Medal, Silver Star, Legion of Merit, Distinguished Flying Cross, Soldier's Medal, Bronze Star Medal, Air Medal, Commendation Ribbon, and Purple Heart.

defensive--1. Condition of a force when it stands ready to protect itself and its position against enemy attack. 2. Resisting attack. Defensive warfare as opposed to offensive warfare. 3. Suitable for defense; meant for protection; as, a defensive position, a defensive weapon.

defilade--1. Protection or shielding from hostile ground observation and flat projecting fire provided by natural or artificial obstacles such as a hill, ridge, or bank. 2. Vertical distance by which a position is concealed from enemy observation. 3. To shield from enemy fire or observation by using natural or artificial obstacles.

deflection--1. Setting on the scale of the sight of the gun to place the line of fire in the direction desired. 2. Horizontal clockwise angle between the axis of the bore and the line of sighting.

delaying action--Type of retrograde operation in which space is traded for time, and maximum punishment is inflicted on the enemy, without becoming decisively involved in combat.

delaying position--Position taken to slow up the advance of the enemy without being decisively engaged.

demilitarization--1. Taking away all military organizations and installations. 2. Disassembly, destruction, or any other action which renders munitions, weapons, and other materiel which is lethal, hazardous, classified, or of a specialized nature, harmless and ineffectual for military purposes.

demobilization--Changing from a war footing to a peacetime or inactive footing.

demolition--The destruction of structures, facilities, or material by the use of fire, water, explosives, mechanical, or other means.

deploy--1. To extend or widen the front of a military unit, extending from a close order to a battle formation. 2. In a strategic sense, to relocate forces to desired areas of operations.

depot--Organized locality responsible for performing one or more of the following missions: reception, classification, storage, issue, maintenance, procurement, manufacture, assembly, repair and salvage of supplies; or for the reception, classification, and processing of personnel.

depth bomb--Steel container filled with a high explosive charge that is used against underwater targets. Depth bombs are set off by hydrostatic fuzes which operate by water pressure at the depth for which they are preset. These bombs are dropped from naval vessels.

deserter--One who absents himself without leave from a military post or duty with the intention of not returning, or of avoiding dangerous duty or important service.

detachment--1. Part of a unit separated from its main organization for duty elsewhere. 2. Military unit which is permanently a separate unit, normally smaller than a platoon, and organized under table approved by the Department of the Army.

direct fire--Gunfire delivered on a target in which the sights of a weapon are brought directly on the target.

direct support--A mission requiring one unit to support another specific unit and authorizing it to answer directly the supported unit's requests for assistance.

disengage--Brake off action with an enemy.

dispensary--A medical treatment facility primarily intended to provide examination and treatment for ambulatory patients, to make necessary arrangements for the transfer of patients requiring bed care, and provide first aid for emergency cases.

displace--Leave one position and take another. When a unit is advancing its command post must displace forward.

division--1. Tactical unit composed of elements of the arms and the services and responsible for its own internal administration. Division is on a command level below a corps and above a regiment or brigade. It is usally commanded by a major general. 2. One of several administrative or operating groups or elements into which a higher headquarters is often divided.

dosimeter--Instrument used to measure the total amount of radiation absorbed during a period of time.

double envelopment--A form of enveloping maneuver executed by three principal tactical groups; a secondary attack force which attacks the enemy position frontally, and two enveloping attack forces which move around the flanks of the enemy position to attack the flanks or objectives in rear of the enemy front line.

double time--1. Marching at the rate of 180 steps, each 36 inches in length, per minute. 2. Preparatory command to march at this rate.

drill--1. Exercises and movements taught and practiced to develop control, discipline and teamwork, and facility in execution. 2. Practice a sequence of acts for learning purposes.

drop zone (DZ)--A specified area upon which airborne troops, equipment, and supplies are dropped by parachute, or on which supplies and equipment may be delivered by free fall.

dud--Explosive munition which has not been armed as intended or which has failed to explode after being armed.

duty officer--Officer detailed to be constantly available for call in emergencies during a specific period.

duty station--Military establishment or post to which an officer or enlisted man has been assigned for duty.

echelon--1. Subdivisions of a headquarters, as forward echelon, rear echelon. 2. Separate levels of command; as compared to regiment, division is a higher echelon, battalion is a lower echelon. 3. Different fractions of a command in the direction of depth, to each of which a principal combat mission is assigned; e.g., attack echelon, support echelon, reserve echelon. 4. Formation in which the subdivisions are placed one behind another, extending beyond and unmasking one another wholly or in part. 5. Separate levels of supply and maintenance responsibility.

electronic jamming--The intentional deliberate radiation or reradiation of electromagnetic waves with the object of impairing the use of a specific portion of the electromagnetic wave spectrum.

elevate--Raise the muzzle end of a gun; increase the angle of elevation.

embarkation area--An area ashore, including a group of embarkation points, in which final preparations for embarkation are completed and through which assigned loads for craft and ships are called forward to embark.

emplacement--1. Prepared position for one or more weapons or pieces of equipment, for protection against hostile fire or bombardment, and from which they can execute their tasks. 2. Act of fixing a gun in a prepared position from which it may be fired.

encode--1. That section of a code book in which the plain text equivalents of the code groups are in alphabetical, numerical, or other systematic order. 2. To convert a plain language message into unintelligible text by means of a code.

encrypt--To convert plain text into unintelligible form (cryptogram) by means of a cryptosystem.

engagement--Encounter between two hostile forces; battle.

enlisted person--Term used to include both the male and female members of the Army below the grade of an officer or warrant officer; enlisted personnel.

enlisted specialist--Enlisted person classified as an occupational specialist by reason of training or experience.

enlistment--The voluntary enrollment for a specific term of service in one of the Armed Forces, as contrasted with induction under the draft law.

envelopment--A form of offensive maneuver in which the main attack is directed against the flank or rear of the initial disposition of the enemy's forces, and toward an objective behind his front lines. It usually contains a secondary attack directed against the enemy's front.

equipment--All articles needed to outfit an individual or organization. The term refers to clothing, tools utensils, vehicles, weapons, and other similar items. In Army and Air Force usage as to type of authorization, equipment may be divided into special (or project) equipment, equipment prescribed by tables of organization and equipment.

escort--1. To convoy. 2. A combatant unit or units assigned to accompany and protect a weaker force. 3. Aircraft assigned to accompany and protect a weaker force. 3. Aircraft assigned to protect other aircraft during a mission. 4. An armed guard that accompanies a convoy, train, prisoners, etc. 5. An armed guard accompanying persons as a mark of honor.

espionage--The use of secret agents to obtain information.

essential elements of information (EEI)--A statement of the additional data regarding the enemy, terrain not under our control, or meteorological or hydrographic conditions which the commander needs in order to enable him to make a sound decision and to formulate details of a plan of operations. The essential elements usually are enunciated in the form of questions posed for the purpose of focusing the attention and activities of all colleting agencies on the high priority information which is needed at a particular time.

estimate of the situation--A logical and orderly examination of all the factors affecting the accomplishment of the mission to determine the most suitable course of action in arriving at a decision.

evacuation--1. Process of moving casualties from a battlefield, and subsequently of moving them along the chain of evacuation as necessary. 2. Clearance of personnel, animals, or materiel from a given locality.

executive officer--The principal assistant and adviser to the commander, who coordinates and supervises the details of operations and administration, thereby enabling the commander to devote himself to the broader aspects of command.

exercise--Military maneuver, drill, or operation carried out for training and discipline.

exploitation--1. Taking full advantage of success in battle and following up initial gains. 2. Phase of offensive action, usually following a successful penetration or envelopment, characterized by rapid advances against lessening resistance. Its purpose may be to take an objective deep in the enemy rear or to pursue a retreating enemy force. 3. Taking full advantage of any information that has come to hand for tactical or strategic purposes. In this meaning, often called exploitation of success.

explosive charge--Explosive used in firing a gun, whether propelling charge, which throws the projectile, or bursting charge, which breaks the casing of a projectile to produce demolition, fragmentation, or chemical action.

exposed--Unprotected from enemy attack. An exposed flank is the side of a defended position or formation that has been left unprotected from an enemy attack.

fall out area--The area on which radioactive materials have settled out, or the area on which it is predicted from weather conditions that radioactive materials may settle out.

feint--1. A show of force intended to mislead the enemy. It normally consists of a shallow, limited, objective attack executed by a small proportion of the total force. 2. Make a pretended blow or attack. 3. In river crossing operations, a show of force by a small proportion of the assault force with a limited objective attack on the far side of the river intended to deceive the enemy as to the exact location of the actual crossing sites.

field army--Administrative and tactical organization composed of a headquarters, certain organic army troops, service support troops, a variable number of corps, and a variable number of divisions. Some or all of the divisions may be assigned or attached from time to time to corps.

field grade--Classification of officers ranking above a captain and below a brigadier general. Field grade includes colonels, lieutenant colonels, and majors.

field hospital--Hospital, usually under tentage, designed to function as a station hospital at isolated posts or airfields, but adaptable to support ground troops in combat. It is classified as a fixed hospital but it can be easily moved and even transported by air.

field maneuver--An exercise conducted in the field under simulated war conditions in which troops and armament of both sides are actually present, either wholly or in part.

field of fire--Area that a weapon or group of weapons may cover effectively with fire from a given position.

fighter airplane--Aircraft designed to seek out and destory enemy aircraft in the air. A fighter airplane has high speed, a high rate of climb, and great maneuverability, but relatively short range.

file--1. Line of persons or things, one behind another. Both rank and file refer to single lines of troops, vehicles, etc., in formation: files are vertical lines from front to rear; ranks are lateral lines from side to side. To cover in file means to get directly behind the person in front of you. 2. March or move to a line. 3. Folder, cabinet, or other device for storing records or documents in order. 4. Put away in order.

fire--1. Shoot; discharge a gun. 2. Shooting; discharge of a gun or a group of guns. 3. Command to fire. The command fire is given by voice or by signal, when a gun or a group of guns is to be fired. 4. Order/request for the guns to commence fire as soon as ready.

fire and maneuver--Method of attack in which one element of a command moves while being supported by the fire of another element or elements.

fire control equipment--Equipment required and used to directly aim guns or controlled missiles at a particular target. Fire control equipment includes all instruments used in calculating and adjusting the proper elevation and deflection of guns or missiles in flight. Included are such items as radars, telescopes, range finders, predictors, directors, other computers, power plants, and communication control systems connecting these elements.

fire direction center--Element of a command post consisting of gunnery and communication personnel and equipment by means of which the commander exercises fire direction and/or fire control.

fire plan--1. Tactical plan for using the weapons of unit/formation so that their fire will be coordinated. 2. Standing directions to the members of a unit for preventing, reporting, or extinguishing fires.

fire support--Assistance to those elements of the ground forces which close with the enemy such as infantry and armored units, rendered by delivering artillery fire, naval gun fire, and aircraft strafing and bombardment.

fire support coordination center (FSCC)--An operating agency of the supported or force commander in which the representatives of the supported unit or force and fire support agency work together to plan and coordinate fire support. This agency provides for effective utilization of the fire support means,

including the timely attack of targets and the shifting of fires in accordance with the plans and needs of the supported unit or force.

firing position--1. Position assumed by the soldier for firing. 2. Position of a weapon ready for firing, as opposed to traveling position.

first aid--Measures given to casualties before regular medical or surgical care can be administered by trained individuals.

first sergeant--Occupational title for the chief noncommissioned officer of a company, battery, or similar unit.

flak--1. Fire of antiaircraft artillery weapons. 2. Antiaircraft artillery.

flame thrower--Weapon which projects and ignites incendiary fuel for destroying material and for casualty effect; may be portable (carried on firer's back) or mechanized (mounted in a combat vehicle).

flank--1. Right or left side of a formation of troops, right or left side of a fortification, etc. 2. Get clear around either side of; as to flank the enemy. 3. Attack from, or on, the side.

hospital--A hospital is a medical treatment facility primarily intended to provide inpatient care. It is appropriately

staffed and equipped to provide diagnostic and therapeutic services, as well as the necessary supporting services required to perform its assigned mission. A hospital may, in addition, discharge the functions of a dispensary.

howitzer--Normally, cannon with a medium length barrel between that of a mortar and a gun in length, operating with a relatively high angle of fire, and using a medium muzzle velocity.

incentive pay--That amount paid to members of the uniformed services entitled to receive basic pay, over the above such basic pay, for performance of hazardous duty under competent orders.

indirect fire--Gunfire delivered at a target that cannot be seen from the gun position or firing ship.

induction station--An organization established to determine the eligibility of individuals for induction into the Armed Forces, to induct those found acceptable, and to allocate them to the various services.

infiltrate--Move through an area or territory occupied by either friendly or enemy troops or organizations. The move is made either by small groups at extended or irregular intervals or by individuals.

initial radiation--The nuclear radiation accompanying an atomic explosion and emitted from the resultant fireball; immediate radiation. It includes the neutrons and gamma rays given off at the instant of the explosion, and the alpha, beta, and gamma rays emitted in the rising fireball and the column of smoke. In contrast to residual radiation, its delivery to persons and objects on the earth's surface is terminated by the removal of the source (fission products in the atomic cloud) from within effective radiation range of the earth by the rising cloud.

insignia--Distinctive devices worn on the uniform to show grade, organization, rating and service.

inspection--Exmination of personnel, barracks, and equipment to check on their condition, efficiency, shortages, cleanliness, etc.

inspector general--An officer detailed as an inspector general who examines and reports on every phase of activity that affects the discipline, efficiency, and economy of a command, installation, or activity.

installation--Real estate and improvements thereon under the control of the Department of the Army at which functions of the Department of the Army are carried on and which has been established by order of the Department of the Army. Where installations are located continuously or on the same reservation, the combined property is designated as one installation and the separate functions as activities of that installation.

integrated fire control system--A system which combines target acquisition and tracking, data computation, gun laying, and firing, primarily using electronic means assisted by electromechanical devices.

intelligence--The product resulting from the evaluation, analysis, integration, and interpretation of information which concerns one or more aspects of foreign nations or of areas of operations and which is immediately or potentially significant to planning.

intelligence estimate--Estimate of the capabilities and vulnerabilities of a foreign power or group of powers, or of a possible or actual enemy, and, when appropriate, of the priority in which such capabilities may be adopted and their effect on the accomplishment of our mission.

intercom--A telephone apparatus by means of which personnel can talk to each other within an aircraft, tank, ship, or activity.

interior guard--Guard within the limits of an installation to keep order, enforce police regulations, and protect the property and personnel of the command. The interior guard may include a main guard, a special guard, and a prisoner guard.

interrogate--1. Examine prisoners of war, or other persons believed to be in possession of information of value, for purposes of intelligence. 2. To challenge for authentication of information over signal communication systems. 3. To inquire by means of a special radio system, whether aircraft and surface vessels are friendly or enemy.

interval--1. Space between adjacent individuals, vehicles, or units in a formation that are placed side by side, measured abreast. The space from front to rear is called distance. 2. Space between adjacent groups of ships of boats measured in any direction between the corresponding ships or boats in each group. 3. As applied to two units of cipher text (letters, diagraphs, code groups, etc.) or key sequence, the number of such units between them counting either the first of last of the two units but not both.

jamming--The deliberate blocking or impairing of reception by any means.

joint exercise--A simulated combat operation of units of two or more services for purposes of training, involving joint planning, preparation, and execution.
